Shrishti Matriculation Higher Secondary School,
Percentage: 96.1%

2011 – 2012
Vellore

**X – Matriculation**
Holy Cross Matriculation Higher Secondary School,
Percentage: 91.6%

2009 – 2010
Vellore

## WORK EXPERIENCE

**SENIOR SOFTWARE ENGINEER**

2019 - Present
**Thomson Reuters, Bangalore**

**SENIOR SOFTWARE ENGINEER**

2018 – 2019
**Infosys, Bangalore**

**SOFTWARE ENGINEER**

2016 – 2018
**Infosys, Bangalore**

## SKILL SET

- **Languages** – JavaScript
- **Front-end Libraries** - React JS, Redux
- **Other Front-end Techs** – HTML, CSS
- **MS Technologies** - Entity Framework, ASP.NET Web API
- **Database** - SQL

# PROJECTS

## Onboarding Tool (OBT)

- A web application developed using **JavaScript**, **React JS**, and **C#**.
- Used **Entity Framework** to establish mapping with **SQL** Server Database.
- Worked on the modules for implementing the Front-end logic using **React JS**.
- The application deals with on-boarding and off-boarding users.
- Users will be assigned with roles based on business requirement.
- The project was developed as per the inputs given by the Client and the web application was successfully deployed in production environment.
- The web application served its purpose by replacing a third-party application, eventually saving **$3000** per year.

**Model used**: Agile model.

**Roles and Responsibilities:** Played a prominent role in the team and also involved myself right from design phase till implementation.

## YouThere

- Developed User Interface using **React JS**.
- Implemented state management using **Redux**.
- Developed **RESTFUL Web API** for front end consumption using **ASP.NET Web API**.
- Development of Database, Tables and other DB components.
- Integrated DB with Back end code using **EF 6 Code First** approach.
- Authentication and Authorization was implemented using **Firebase**.
- Usage of **GITHUB** as source control and version management.
- Business logic implementation using C# and LINQ for DB changes.
- Incorporated Swagger UI to visualize, interact with the API resources.

**Model used**: Agile model.

**Roles and Responsibilities**: Developed multiple Front-end modules and complete back end API and DB development. Active Involvement right from design phase till implementation.
